Behavioral Contract System

1. **Pedagogical Objective** The Behavior Contract serves as a formal reinforcement system that aligns expectations across school and home environments. It is engineered to provide the student with clear, observable behavioral targets and a predictable reward structure.
2. **Key Innovations & Functional Advantages**
 - **Operational Definition of Success:** The "This looks like" section translates abstract concepts (e.g., "Being kind") into specific, actionable behaviors (e.g., "Listening to my teachers"), which is critical for students who require concrete social modeling.
 - **Multi-Tiered Reinforcement:** The contract differentiates between immediate school-based rewards and long-term (weekly) home-based rewards. This dual-layer approach reinforces the generalization of skills outside the classroom setting.
 - **Targeted Success Goals:** The "My Success Goals" module allows educators to set individualized performance and honesty thresholds, making the contract highly adaptable to the specific needs of an Inclusive Classroom .
 - **Triadic Accountability:** Formal signature lines for the Student, Teacher, and Parent codify the collaborative support system, ensuring all stakeholders are committed to the student's behavioral adjustment .

Date:

BEHAVIOR CONTRACT

GOAL BEHAVIOR

I _____ am working on:

☐ Following directions

☐ Listening to my teachers

☐ Staying calm

☐ Other:

☐ Being kind to others

This looks like:

MY SUCCESS GOALS

To earn my rewards, I must meet the targets:

Daily performance: I will earn at least [___] total points from my teacher's rating.

Daily honesty: I will match my teacher's rating on at least [___] behaviors.

REWARD

School (Immediate): If I meet my Performance Goal, I earn:

Home (Weekly): If I meet my Honesty Goal [___] days, I earn:
