

Project Rationale: Treasure Token PBIS Digital System

Developer: Jasmine Jing M. Mangayan

1. System Functionality & Components

The Treasure Token system is a digitized Positive Behavioral Interventions and Supports (PBIS) framework designed to gamify classroom management and simplify behavioral tracking.

- Behavioral Rubric: A structured "price list" using a tiered point system. Students earn between +1 to +10 tokens for positive actions, while specific deductions are applied for classroom disruptions.
- Rewards Menu: Includes a mix of Individual Incentives (e.g., earned Tablet time) and Collaborative Goals (e.g., a whole-class Popcorn Party) to build a sense of community.
- Bridge Week Tracker: A smart, automated interface for teachers. Powered by embedded JavaScript, it handles daily point entries, calculates totals, processes reward claims, and manages balance carry-overs automatically.

2. Solving Teacher Challenges

This system is specifically engineered to address the unique pressures faced by educators in the Philippine context.

- Reducing Administrative Load: Automates the tracking process to give back time to teachers burdened by heavy documentation (DLL/DLP).
- Offline Resilience: Designed as a standalone PDF. It requires zero internet connectivity once downloaded, ensuring it is fully functional for "Last Mile" schools and areas with limited infrastructure.
- Pedagogical Shift: Moves the classroom away from punitive discipline and toward Social-Emotional Learning (SEL) by emphasizing teamwork, accountability, and shared success.

3. Statement of Development & Credits

Technical Development: AI was utilized as a technical scaffold specifically for JavaScript automation. This collaboration allowed the developer to focus on the pedagogical logic and instructional design.

- Originality: All pedagogical decisions, behavioral variables, and reward structures are the original work of the developer.
- Visual Attribution: Aesthetic elements are adapted from the SlidesCarnival "Cute Farm Harvest" template to create an engaging, student-friendly environment.

Growth Tokens

INDIVIDUAL GOALS		
Token	Name	Criteria
+10	The Mastery Level	Independence: Solving a complex conflict or academic problem without teacher help.
+10	The Mentor	Leadership: Teaching a group of peers a skill or helping them stay on task.
+10	The Goal Achiever	Consistency: Meeting a personal behavioral goal for an entire week.
+5	Social Responsibility	Empathy: Helping a classmate understand a difficult instruction.
+5	Critical Engagement	Inquiry: Asking a deep "why" question that helps the whole class learn.
+5	Self-Regulation	Choice: Choosing to use a calming strategy instead of reacting to a frustration.
+1	The Step Forward	Effort: Attempting a task that feels new or difficult.
+1	Contribution	Small Act: A quick act of kindness or tidying a shared space.
+1	Moment of Focus	Reset: Quickly returning to work after a minor distraction.

CLASSROOM GOALS		
Token	Name	Criteria
+20	Collective Stewardship	All desks are cleaned and materials are stored properly without reminders.
+25	The Silent Flow	The entire class manages a difficult transition (like entering the room) silently.
+30	Community Co-Regulation	The entire class successfully uses a shared "calming" strategy to reset energy.

RESETS		
Token	Name	Criteria
-10	High Support	Direct aggression, unsafe behavior, or refusing instructions.
-5	Strategy Check	Repeatedly struggling to follow community agreements after a reminder.
-1	Quick Pause	A small lapse in focus or talking out of turn requiring a "reset".

REWARDS

INDIVIDUAL REWARDS		
Token Cost	Reward Name	Pedagogical Purpose
15	The Voice	Choice & Agency: The student picks a book to read first or selects the "Brain Break" song.
30	The Assistant	Responsibility: The student serves as the Teacher's Apprentice for a day or acts as the Line Leader.
60	The Innovator	Decision-Making: The student chooses the next class activity or receives 15 minutes of Tablet exploration.
100	The Specialist	Skill Mastery: The student receives a Homework Pass or is allowed to "Sit in the Teacher's Chair" during a lesson.

CLASSROOM REWARDS		
Token Cost	Reward Name	Shared Experience
200	The Global Journey	Curiosity: A Virtual Tour for the whole class to explore a new place or culture together.
350	The Harvest	Community Celebration: A Popcorn Party or a Themed Dress-up Day to celebrate collective growth.

Disclaimer: Statement of Originality and AI Assistance

- This "Treasure Token" PBIS system was conceptualized and designed by Jasmine Jing M. Mangayan specifically for the Philippine basic education context.
- Originality & Pedagogy: All pedagogical decisions, including the selection of behavioral variables, the structure of reward tiering, and the formulation of classroom goals, are the original work of the developer.
- AI Collaboration: Artificial Intelligence (AI) was utilized strictly as a technical scaffold to assist in generating the underlying JavaScript automation and the technical data architecture.

Technical and Copyright Notice

Visual Design & Attribution

The visual elements of this system are adapted from the SlidesCarnival "Cute Farm Harvest" template. These assets are used in full accordance with their Creative Commons attribution guidelines.

- Purpose and Intended Use
- This tool is engineered for offline use to directly address two critical challenges in local teaching environments:
- The Digital Divide: Ensuring functionality in areas with limited connectivity.
- Administrative "Document Fatigue": Streamlining the heavy reporting load (DLL/DLP) faced by Filipino educators.

Liability & Usage

Notice: The developer assumes no liability for technical errors or system failures resulting from unauthorized modifications made to the embedded JavaScript. To maintain system integrity, users are advised to use the interface as provided.
